An initiative of OSCA inc.

Summary of Outcomes of Public Meetings called by Ocean Shores Community Association re Flood Crisis in Greater Ocean Shores Area

1) One resolution came out of the first meeting held at Ocean Shores Community Centre ... A vote of no confidence in the Marshall's Creek Floodplain Management Committee was moved and Council was asked to consider dissolving this committee.

At the second meeting, held at Sth Golden Beach Community Centre, Councillors were asked ... that if it can be proven that flood waters can be lowered will they support action to lower the flood waters in the near future?

2) Irrefutable evidence is now available confirming the closure of natural flood outlets as well as Byron Shire Council's accepted liability due to this action.

Please view web pages www.brunswickvalley.com.au/flood-history

3) People opposed to the above truths did not refute any of the facts presented and did not make any attempt at the public meetings to prove or defend their own arguments as presented in local press in the weeks preceding the meetings..

4) There needs to be a presentation to both the Byron and Tweed Shire Councils in order to inform them of their joint liability due to the actions of previous Councils and their present day duty of care to the residents of this Shire.
